

Everything Your Library Needs to Prepare Students for University Research

Customizable home screen offering point-of-need instruction to highlight valuable research resources while students search.

Why Source Reference?

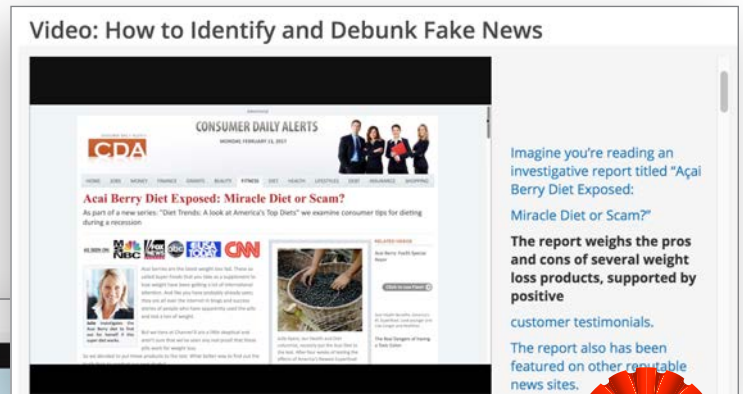

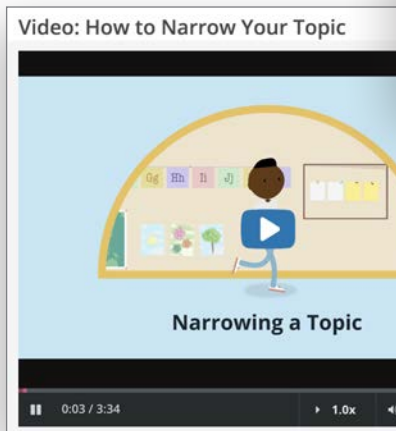

Students today are asked to navigate a complex world of digital information. However, many struggle to search effectively, evaluate sources, and communicate their findings.

Prepare students for the rigors of academia by building their confidence with the types of resources they will see at university, while also cultivating essential information literacy skills.

What Is Source Reference?

The one-stop shop for research and information literacy skill development

Help your students start their research while building better research skills with this easy-to-use reference platform and its engaging information literacy videos. *Source Reference* is an integrated research and information literacy skill development platform containing curated reference content, instructional videos, and tutorials—the ideal starting point for any research project or information literacy course.

During your academic career, you'll be assigned research papers that let you choose your own topic. With so many areas of research available, the tough part is deciding where to start. This video will break down the cyclical nature of the research process, and explain how to choose and narrow a topic into an appropriate research
